Ms. Avery Chen
Head of Operations
Riverbend Logistics
100 Harbor Street
Portland, OR 97201

Dear Ms. Chen,

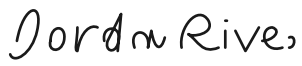
I am writing to apply for the Operations Strategy Manager position at Riverbend Logistics. Your plan to automate the Portland distribution center is the kind of project I have worked on for the last six years, first on the factory floor and then on the product side.

At Halden Robotics, I manage a warehouse picking robot used at 40 customer sites. I work daily with operations teams like yours to understand where automation helps and where it gets in the way, and I redesigned our setup process so that new sites go live in half the time.

Before that, as a process engineer at Brightwater Manufacturing, I increased the throughput of an assembly line by 18% without buying new equipment, and halved scrap rates by introducing statistical process control.

I would welcome the chance to discuss how this experience could help Riverbend. Thank you for your time and consideration.

Sincerely,



Jordan Rivera
